## Scope of Work for the Shipowner

- Concept development
- Consultancy pre-service package

## Scope of Work for the Shipyard

- Approval design
- Technical procurement support

## Project Features

- The vessel is based on Deltamarin's energy-efficient and operationally optimised 1,000-3,000 TEU container vessel design, intended for feeder service
- The concept was developed for the two ship owners to fit their trading routes in the polar area
- The vessels are designed to achieve the best possible key performance indicators, such as container carriage variety, homogenous loading capacity, optimal manoeuvrability and harsh weather seakeeping performance
- The vessels will comply with IMO NOx TIER III requirements by EGR and, thanks to the built-in scrubber system, sulphur oxide (SOx) emissions are also minimised
